PROFILE

Hans Hafner works as a composer for film, television, documentaries and industrial film / advertisement. Hans' music is very diverse ranging from classical ensembles (both large and small) to conventional band-sounds to modern soundscapes and sound design. At the center of the music is always the desired emotional effect. The music is character driven and the themes are clearly structured where a theme may be a melodic or may be a certain type of sound or sound-bed that creates the right backdrop for a situation or a character.

Besides composing Hans works as a preset sound designer and beta-tester for u-he (creator of music software) and writes articles for the German Sound&Recording magazine.
